**DETAILED ACTION**

***Election/Restrictions***

The Preliminary Amendment filed 21 August 2001 was inadvertently not entered prior to the previous Office Action. Since this amendment effectively presents only claims to one species, the Election requirement of Paper #2, the Office Action mailed 25 February 2002 is withdrawn. An action on the merits of the elected species follows.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by US 5,424,490, granted to Dombrowski et al. (hereafter Dombrowski).

Dombrowski discloses, referring to figure 3, a circuit board (10) comprising: a substrate having an array of vias (12-43), the array of vias defining a set of channels on the substrate; and three bus traces (associated with rows 41, 42, 43) routed on the circuit board so as to enter a first channel belonging to the set of channels and to exit a second channel belonging to the set of channels, the first and second channels adjacent to each other so that there is one row of vias between the first and second channels, wherein each of the three bus traces are connected to a via belonging to the row of vias so as to define three connections, wherein the three connections do not overlap the three bus traces.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following documents disclose bus routings on circuit boards:

US 4,434,321	Betts,
US 5,128,832	Lawrence,
US 5,706,178	Barrow.
